

Course Syllabus - MBBCh

1. Course Title: Gynecology & Obstetrics			Course Code: OBG431		
2. Credit/contact hours:	Theory Hours 64	Practical Hours 240			
3. Number of weeks	16				
4. Level/year at which this course is offered:	Y3S2, Y4S1				
5. Pre-requisites for this course (if any): Completion of Basic sciences					
6. Co-requisites for this course (if any): none					

Course Description

This is an academic duration during which students will consolidate previously learned foundational knowledge and skills relevant to the practice of obstetrics and gynecology and gain further experience relevant to the different health issues and problems pertinent to women's health. Clinical experience will be gained during rotations in ambulatory and in-patient services. It is mainly hospital based. It includes clinical rounds, antenatal referred clinical attendance & labour room attendance. The skills lab and simulation facilities will be utilized to fulfil objectives of the course. Activities and skills are to be documented in a logbook and a portfolio. Performance of students will be continuously monitored and assessed using the various WPBA instruments

Course Learning Outcomes

CLOs		Aligned-PLOs
	Knowledge:	
K1	Explain the normal and pathological conditions of pregnancy, antepartum, intrapartum and post-partum including contraception.	A1
K2	Describe the epidemiologic and preventive aspects of common conditions related to Obstetrics and Gynaecology.	A2
K3	Explain the normal and pathological conditions of menstrual cycle including puberty and menopause and abnormal uterine bleeding	A2
K4	Explain etiology and evaluation of infertility, including abortion.	A2

CLOs		Aligned-PLOs
K5	Describe common benign and malignant gynecological conditions including risk factors, signs and symptoms and initial evaluation.	A2
Skills		
S1	Demonstrate competence in the medical interview and physical examination of Obstetrical and Gynecological conditions.	B1
S2	Identify the conditions in Obstetrics and Gynecology where you need to intervene urgently	B2
S3	Select the most appropriate and cost-effective investigation to reach the proper diagnosis, considering the patient rights and abilities and the capabilities of the health system services.	B2
